

SNEZANA KRAGUJEVAC

Full-Stack Developer

Gothenburg, Sweden | 070-735 35 66 | sneza.kragujevac@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-stack developer with a frontend foundation in React, TypeScript, JavaScript, HTML, CSS, and Tailwind CSS, complemented by ongoing backend development studies. Builds responsive, accessible web applications that integrate REST APIs, Supabase authentication, protected routes, booking, bidding, and dynamic content workflows. Strengths include structuring reusable components, refactoring client-side logic, improving usability and responsiveness, and using Git and GitHub workflows to deliver academic and collaborative projects.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+ and ES Modules), TypeScript, React, responsive and mobile-first design

Styling & UX: Tailwind CSS, Figma, accessible interface improvements

Backend & APIs: Supabase, REST API integration, Fetch API, authentication, protected routes, LocalStorage

Tools & Delivery: Git, GitHub, Netlify deployment

SELECTED PROJECTS

Holidaze - Accommodation Booking Platform | Noroff, 4th Semester Project 2026

- Built a responsive React and TypeScript booking platform with REST API integration, enabling users to browse venues, register, and manage bookings while venue managers create and update listings.
- Structured the application with reusable components and improved state management, layout consistency, responsiveness, and accessibility for a more maintainable user experience.

[Live site](#) | [GitHub](#)

Auction House | Noroff, Semester Project 2 2025

- Developed a responsive auction platform using React, Tailwind CSS, Supabase, and a REST API, supporting listing creation, bidding, and auction management.
- Refactored the layout and component hierarchy, improved mobile responsiveness, and optimized image handling to strengthen readability and usability across listings.

Supabase News Platform | Noroff, 3rd Semester Project 2025

- Created a content publishing platform with JavaScript, HTML, CSS, and Supabase, implementing user authentication and dynamic article management.
- Refactored JavaScript logic and improved accessibility, loading behavior, and layout structure to make content clearer and easier to use.

WIRES - Social Platform | Noroff JavaScript 2 Course Assignment 2025

- Built a JavaScript social application using ES Modules, the Fetch API, HTML5, CSS3, and the Noroff Social API v2, supporting registration, login, profiles, navigation, and logout.
- Implemented token storage, form validation, protected routes, automatic redirects, and LocalStorage-based session handling for authenticated users.
